I mean you have to give me credit. I bought the game and idle for 6 minutes just to leave a negative review for this low effort PUBG clone game. Refunding now.. I rate this 99.999 out of 99.999. Remember like and subscribe if you agree and if you don't.you're wrong.. Still better and more original than PUBG. it is terribly, controls are miserable, there is no locomotion and it is designed for the use of a "pp gun". This game is an amazing idea, never seen anything like it! Be careful there are a few

clones trying to copy this one, these clone games are called "Fortnite" and "Playerunknown's Battlegrounds" (what kind of garbage names are they? hahaha) Anyway gameplay: AMAZING, I don't have the ppgun so I just use a guitar hero guitar and it works flawlessly. The guns are great never seen any of them in any other games and I got the chicken dinner 2 times today.
